

THE VOMELA COMPANIES

AN INVESTMENT FOR THE BUSINESS

The Vomela Companies have called St. Paul home for over 70 years and have always been committed to creating a company culture of corporate social responsibility. That commitment is evident in their new 300,000 square-foot headquarters on the east side, which boasts the largest rooftop solar array in the city. The 1.3 Megawatt solar array offsets roughly 30% of Vomela's energy usage and produces 1.6 million kilowatt hours of electricity each year.

“Everyone on the team at Vomela agrees that there's nothing quite like making a change where everyone involved feels bettered by the outcome”

GOOD NEWS FOR EVERYONE

Monte Hillman, Senior VP of Real Estate Development with the St. Paul Port Authority, wasn't surprised by Vomela's clean energy investment. "The owner looked at the business case and how much free energy they could get off the production costs and it clicked instantly. It was the smartest thing he could do for his business and he can tell his customers he's doing the right thing for the planet."

At the ribbon cutting event for Vomela's new facility, St. Paul Mayor Melvin Carter spoke about the positive impact that solar can have on the community. "This rooftop solar array is good news for our environment, its good news for our children, its good news for our lungs and its good news for our future, so we're excited about that"
